## BARBAREÑO CHUMASH ARCHAEOLOGICAL SITE MONITORS LIST

To comply with the regulations cited below, any property within the limits of the City of Santa Barbara may be required to have a professional archaeological examination before ground-disturbing activity can be permitted. If the site contains any Native American artifacts or human remains, a direct lineal descendant of the Barbareño Chumash must be present during any ground disturbing activity which might take place. The following list has been compiled by the Community Development Department of the City of Santa Barbara to assist archaeologists, developers and property owners in carrying out Phase I, Phase II and Phase III Cultural Resources Studies in compliance with the City's Master Environmental Assessment (MEA) document and the California Environmental Quality Act (CEQA). These laws require that the City seek to avoid damaging effects on archaeological and historical resources whenever feasible. If avoidance is not feasible, the importance of the site must be evaluated by a professional archaeologist and a Barbareño Chumash site monitor.

Although there are other qualified Native American Monitors in Santa Barbara County, the monitors on this list are direct lineal descendants of Barbareño Chumash and have knowledge of archaeological site excavation procedures for Phase I-III projects within the City of Santa Barbara. The list has been assembled with the advice of Dr. John Johnson of the Santa Barbara Museum of Natural History and Dr. Michael Glassow of the University of California, Santa Barbara who are professional anthropological specialists in Santa Barbara archaeological and Chumash studies. This list is not meant to be exclusive and additional names may be added if qualifications are provided to the City Historian that prove direct lineal descendancy from Barbareño Chumash. Placement on this list does not imply endorsement or recommendation of these consultants by the City of Santa Barbara. Costs for any Phase I-III surveys are not determined by the City of Santa Barbara but are to be negotiated by the Barbareño Chumash Monitor and the contracting property owner, applicant, or archaeologist. These monitors must work in conjunction with a qualified archaeologist, unless otherwise determined by the City Environmental Analyst.
